Getting Started

Introducing Coinnection

Coinnection, Inc. is a Miami, Florida based cryptocurrency firm established by a group of professionals experienced in the global trade of commodities, forex trading, securities, trade finance, and cryptocurrency. Coinnection was established to deploy idle retained earnings by purchasing both small and large quantities of Bitcoin, through over-the-counter private transactions.

After engaging the over-the-counter marketplace, we quickly observed that most offers, transaction methodologies, and documentation were unintentionally incomplete or incoherent. The apparent solution was to synergistically engineer a safe, secure, and balanced protocol for the over-the-counter sale and purchase of Bitcoin. As such, Coinnection's team engaged its 300 plus years of combined professional experience and developed the Coinnection Protocol. **The Coinnection Protocol is the safest way to securely sell or purchase Bitcoin!**

Because Coinnection is a privately held corporation, and not a cryptocurrency exchange, we do not require a complicated or intrusive onboarding process, nor do we have a low maximum payable per day limit. As outlined in the Coinnection Protocol, Coinnection will deliver a bank issued payment guarantee bond to a qualified seller; then, after delivery, confirmation, and settlement, Coinnection sends payment in full on the same day.

Coinnection is ready, willing, and able to purchase quantities of Bitcoin worth approximately US\$500,000.00, and will purchase up to US\$250,000,000.00 of Bitcoin, per seller, per day, exclusively via the Coinnection Protocol.

This Corporate Profile introduces qualified sellers of Bitcoin, their legal and transaction teams, and industry brokers to Coinnection and the Coinnection Protocol to determine if selling Bitcoin to Coinnection via the Coinnection Protocol is viable and how to get started.

Please freely share this profile with individuals, corporate entities, and family offices seeking to securely sell Bitcoin.

Thank you for your time and consideration.

The Coinnection Protocol

The Coinnection Protocol is based upon the logic that a simple, but well-engineered transaction apparatus will reliably protect and secure transacting parties, while outperforming the high-risk, overcomplicated, and expensively ambiguous cryptocurrency sale and purchase methodologies currently available. The protocol protects, secures, and mitigates the seller's and buyer's risk of catastrophic loss caused by a nefarious or incompetent counterparty.

Such mitigation is accomplished through a clearly defined, step-by-step transaction protocol, which includes the deployment of a longstanding and proven financial instrument frequently used in the global trade of commodities – a bank issued payment guarantee bond.

A bank issued payment guarantee bond, such as a bank guarantee, is a formal guarantee of payment issued and delivered by the buyer's bank to the seller's bank. In a bank guarantee, the buyer's bank attests that the buyer has a specific amount of money on deposit, that the funds are of non-criminal origin, and have been irrevocably blocked or set aside by the buyer's bank to support a specific sale and purchase agreement, for a specific period of time.

In the bank guarantee, the buyer's bank agrees that if, after the seller has delivered a commodity for inspection, settlement, and payment, the buyer does not independently send payment in full; then, after being notified by the seller's bank, the buyer's bank will use the buyer's blocked funds to send payment in full to the seller, within a set time period.

After a buyer's bank issues and delivers a bank guarantee, a now fully protected seller is able to securely deliver the commodity being sold and purchased to the buyer's designated point of delivery for inspection, settlement, and payment. The seller is able to deliver its asset without concern, but with certainty that if the buyer does not make payment, the buyer's bank will. The bank issued payment guarantee bond is a standardized best practice in the global delivery, inspection of, and payment for several trillion dollars of commodities per annum.

The bank guarantee creates a framework of security wherein a buyer is not required to prepay for goods prior to delivery and inspection, and by virtue of the bank guarantee, the seller's risk of loss is fully mitigated.

As such, with a bank guarantee in place, if the seller delivers any Bitcoin and the buyer does not make payment in full; then, the seller's bank simply notifies the buyer's bank, who becomes irrevocably obligated to send payment to the seller using the buyer's blocked funds, within one banking day. The Coinnection Protocol ensures the intended outcome of the transaction is realized for the seller, buyer, and brokers while simultaneously mitigating prevalent industry friction, failure, and fraud centers. Furthermore, it balances the cutting-edge technology and volatility of cryptocurrency with the security of transacting within a compliance supported institutional environment. **The Coinnection Protocol is the safest way to securely sell or purchase Bitcoin!**

The protocol is initiated by a seller and/or the seller's attorney speaking with the buyer and/or the buyer's attorney. The purpose of this communication is to jointly confirm that both parties are ready, willing, and able to transact.

After the preliminary conference, the seller completes a simple, one-page Transaction Overview and emails it to the buyer for review. If the parties decide to proceed after due diligence, transaction agreements are executed via DocuSign and the seller completes a jointly agreeable Proof of Coin & Wallet Control.

Upon the successful completion of the Proof of Coin & Wallet Control, the buyer's bank issues and delivers the bank guarantee. The seller's bank receives and confirms the bank guarantee. The seller then delivers a tranche of Bitcoin worth approximately 95% of the face value of the bank guarantee to the buyer for **the same-day settlement and payment of the entire tranche.**

***Note.** The purpose of the 'approximately 95%' delivery to value, is to protect the seller from market price fluctuations during the delivery, confirmation, settlement, and payment process and to keep the number of Bitcoin delivered to whole numbers instead of fractions of Bitcoin. The guideline is to deliver of an approximate amount such as 1,475.0000 Bitcoin, instead of an exact amount, such as 1,484.3731 Bitcoin.

Once six (6) confirmations on the blockchain have occurred, the tranche is divided into lots with a maximum of 500 Bitcoin each. Lot & tranche settlement occurs through a back-to-back 20-minute to 30-minute confirmation, settlement, and payment process, completed via Zoom.

***Note.** Lots are utilized in the sale and purchase process to ensure payments sent via bank wire are generally less than \$50,000,000.00, for efficiency of most operator's internal compliance and financial control policies; and, to facilitate the bridge between margin-based and cost-basis investment strategies.

After both the seller and buyer are connected via a Zoom meeting, the buyer initiates 'Lot Settlement' by obtaining the 'Market Price' of Bitcoin as per blockchain.com and applying the 'Purchase Discount,' which calculates the 'Purchase Price' of one Bitcoin. The Purchase Price is then multiplied by the number of Bitcoin in the lot to calculate the 'Lot Purchase Price.' The buyer then

promptly posts the Market Price, Purchase Price and Lot Purchase Price into the chat window of Zoom for the seller's approval. Assuming the seller accepts the buyer's calculation, their acceptance is confirmed by the seller posting 'Accepted' into the chat window within twenty (20) seconds. The buyer acknowledges the seller's acceptance and immediately completes, signs, and sends a simple one-page 'Lot Settlement Statement' via DocuSign for the seller's countersignature; after which, the buyer makes payment via bank wire or SWIFT MT103 within ten (10) minutes and emails a jointly agreeable 'Proof of Payment' to the seller. The process is repeated back-to-back until settlement and payment of all lots has occurred. Any Bitcoin rejected for cause will be returned.

After payment for all lots of a tranche have been sent, the buyer completes, signs, and sends a simple one-page 'Tranche Settlement Statement,' via DocuSign for the seller's countersignature. The seller does not sign the statement until after all payments have posted to the seller's bank account. If the buyer's payment does not arrive, the seller simply contacts its bank to call the bank guarantee to receive payment, in this case – within one banking day.

The Coinection Protocol is supported by five primary documents, which include the: **Sale and Purchase Agreement**, and supporting appendixes, which include the seller's and buyer's Corporate Information Summary, the jointly agreed verbiage of the bank guarantee, and the Tranche & Lot Settlement Statements.

The protocol is also supported by the **Seller's Affidavit** and **Buyer's Affidavit**, which are compliance required affidavits in which the seller attests to the non-criminal origin of its Bitcoin and the buyer attests to the non-criminal origin of the purchase funds. The broker's fees are identified, protected, and distributed through the **Fee Protection Agreement**.

As the protocol organically limits the non-broker parties involved to the seller, buyer, and their respective retained counsel and bank officers, risk is further mitigated by eliminating the need for the involvement of a third-party escrow or exchange and the potential damages and expenses caused by a mistake or nefarious act.

The Coinection Protocol is scalable to manage the sale and purchase of Bitcoin valued at least approximately \$500,000.00, via a one-time transaction or thousands of Bitcoin through the reoccurring delivery and settlement of multiple tranches.

The Coinection Protocol is deployed through the following twelve (12) steps:

Protocol Step 1 – Introduction to Coinection

The Seller receives and reviews the Coinection Corporate Profile.

Protocol Step 2 – Introduction Call

If a Seller is interested in selling Coinnection their Bitcoin via the Coinnection Protocol, the Seller is introduced to a Coinnection Transaction Director via a Zoom meeting.

Protocol Step 3 – Transaction Proposal

If the Seller and Coinnection agree to the general terms and conditions, such as total quantity and purchase discount, the Transaction Director emails the Seller a comprehensive Transaction Protocol.

The Transaction Proposal is a comprehensive overview of the proposed transaction. It includes a Letter of Intent, the Coinnection Protocol, and template transaction agreements, which include:

1. Sale & Purchase Agreement
2. Seller Affidavit (for AML)
3. Buyer Affidavit (for AML)
4. Fee Protection Agreement
5. Transaction Overview

Protocol Step 4 – Seller Engagement

After reviewing the proposal, if the Seller elects to proceed, they will email the Transaction Director the following:

1. Seller Corporate Information Summary
2. Seller Signatory Passport (institutions exempt)
3. Completed Transaction Overview passport.

The Transaction Director receives and reviews the Seller's email and forwards to Compliance.

Protocol Step 5 – Compliance

Compliance completes the Seller Approval Process. After Compliance approval, a Compliance Director will:

1. Notify the Transaction Director and Seller via email.
2. Create and share a Transaction File with Transaction Team and Seller.
3. Assign a Transaction Reference Code.
4. Prepare the clean copy of the Sale and Purchase Agreement.
5. Prepare the clean copy of the Seller Affidavit.
6. Prepare the clean copy of the Buyer Affidavit.
7. Prepare the clean copy of the Fee Protection Agreement.
8. Send the clean copies to the Transaction Director for review and approval.

Protocol Step 6 – Transaction Agreements

Upon the Transaction Director's approval, a Compliance Director signs and sends the Transaction Documents to the Seller via DocuSign for countersignature.

The Seller countersigns the Transaction Documents via DocuSign.

Protocol Step 7 – Proof of Coin & Wallet Control

The Seller, Transaction Director, and Transaction Controller/Transaction Counsel complete a Proof of Coin & Wallet Control.

Protocol Step 8 – Payment Guarantee

The Payment Guarantee issued, delivered, and confirmed.

Protocol Step 9 – Confirmation, Settlement & Payment

The Seller delivers their Bitcoin for confirmation, settlement, and payment, which occurs through the following five (5) steps:

Confirmation, Settlement & Payment Step 1

On each weekday during the sale and purchase process, the Seller initiates the delivery of a tranche of Bitcoin valued at approximately 95% of the payment guarantee to Coinection's wallet for confirmation, settlement, and payment.

Ex: For this example, please assume that based upon the market price of Bitcoin, a tranche of 1,475.0000 Bitcoin has been delivered.

Confirmation, Settlement & Payment Step 2

After each completion of delivery and six (6) confirmations on the blockchain, the tranche is divided into lots with a maximum of 500 Bitcoin each.

Ex: In the example of 1,475 Bitcoin being delivered, there would be a total of three lots with Lot 1 and Lot 2 having 500 Bitcoin each and Lot 3 containing 475 Bitcoin.

Confirmation, Settlement & Payment Step 3

Lot Settlement occurs through the following process:

1. Coinection's Transaction Controller/Transaction Counsel obtains the 'Market Price' of Bitcoin as per blockchain.com and applies the 'Purchase Discount', which calculates the 'Purchase Price' of one (1) Bitcoin.
2. The Purchase Price is then multiplied by the number of Bitcoin in Lot 1 to calculate the 'Lot Purchase Price'.
3. Coinection's Transaction Controller/Transaction Counsel then promptly posts the Market Price, Purchase Price, and Lot Purchase Price into the chat window of Zoom for the Seller's approval.
4. The Seller promptly confirms its acceptance by posting 'Accepted' into the chat window of Zoom.
5. Coinection's Transaction Controller/Transaction Counsel acknowledges the Seller's acceptance and immediately completes, signs, and sends a simple one-page 'Lot Settlement Statement' via DocuSign.

6. Seller countersigns, after which, Coinnection must make payment via SWIFT MT103 within ten (10) minutes and email the Seller a Proof of Payment.

Confirmation, Settlement & Payment Step 4

After the Transaction Controller/Transaction Counsel has emailed the Seller a Proof of Payment for first lot, the Lot Settlement of the remaining lots in the tranche immediately occur.

Ex: In the example of 1,475 Bitcoin, after Lot Settlement for the 500 Bitcoin in Lot 1 has occurred, the Lot Settlement process is immediately repeated with the 500 Bitcoin in Lot 2, followed by the 475 Bitcoin in Lot 3.

Confirmation, Settlement & Payment Step 5

Once confirmation, settlement, and payment for all lots have occurred, Coinnection's Transaction Controller/Transaction Counsel sends a simple one-page 'Tranche Settlement Statement' via DocuSign for the Seller's countersignature; which only occurs after payment for all lots of the tranche have posted to the Seller's account.

If Coinnection's payment does not arrive, the Seller contacts their bank to call the payment guarantee to receive payment within one day.

Protocol Step 10 – Compliance Review

After the completion of a tranche, Coinnection's Compliance completes the Compliance Review Process to confirm the intended results of the transaction for the Seller, Coinnection, and brokers were realized.

If an error is discovered, Compliance will notify those involved and ensure the requisite corrective action occurs.

If accurate, the file is sent to Transaction Audit.

Protocol Step 11 – Audit & Archive

After the completion of the Compliance Review Process, a Transaction Auditor completes an audit to confirm the intended results of the transaction for the Seller, Coinnection, and brokers were realized.

If an error is discovered, the Transaction Auditor will notify Compliance, who will notify those involved and ensure the requisite corrective action occurs.

If accurate, the file is archived.

Coinection Cares

Protocol Step 12 – Coinection Cares

After the sale and purchase, compliance, and audit processes have occurred, a mission critical operation remains – Coinection Cares.

Coinection is committed to creating effectual change within the world through the Coinection Cares initiative. Working through established non-profits and employing progress-oriented methodologies, Coinection dedicates at least 25% of net income realized by its purchase of Bitcoin via the Coinection Protocol.

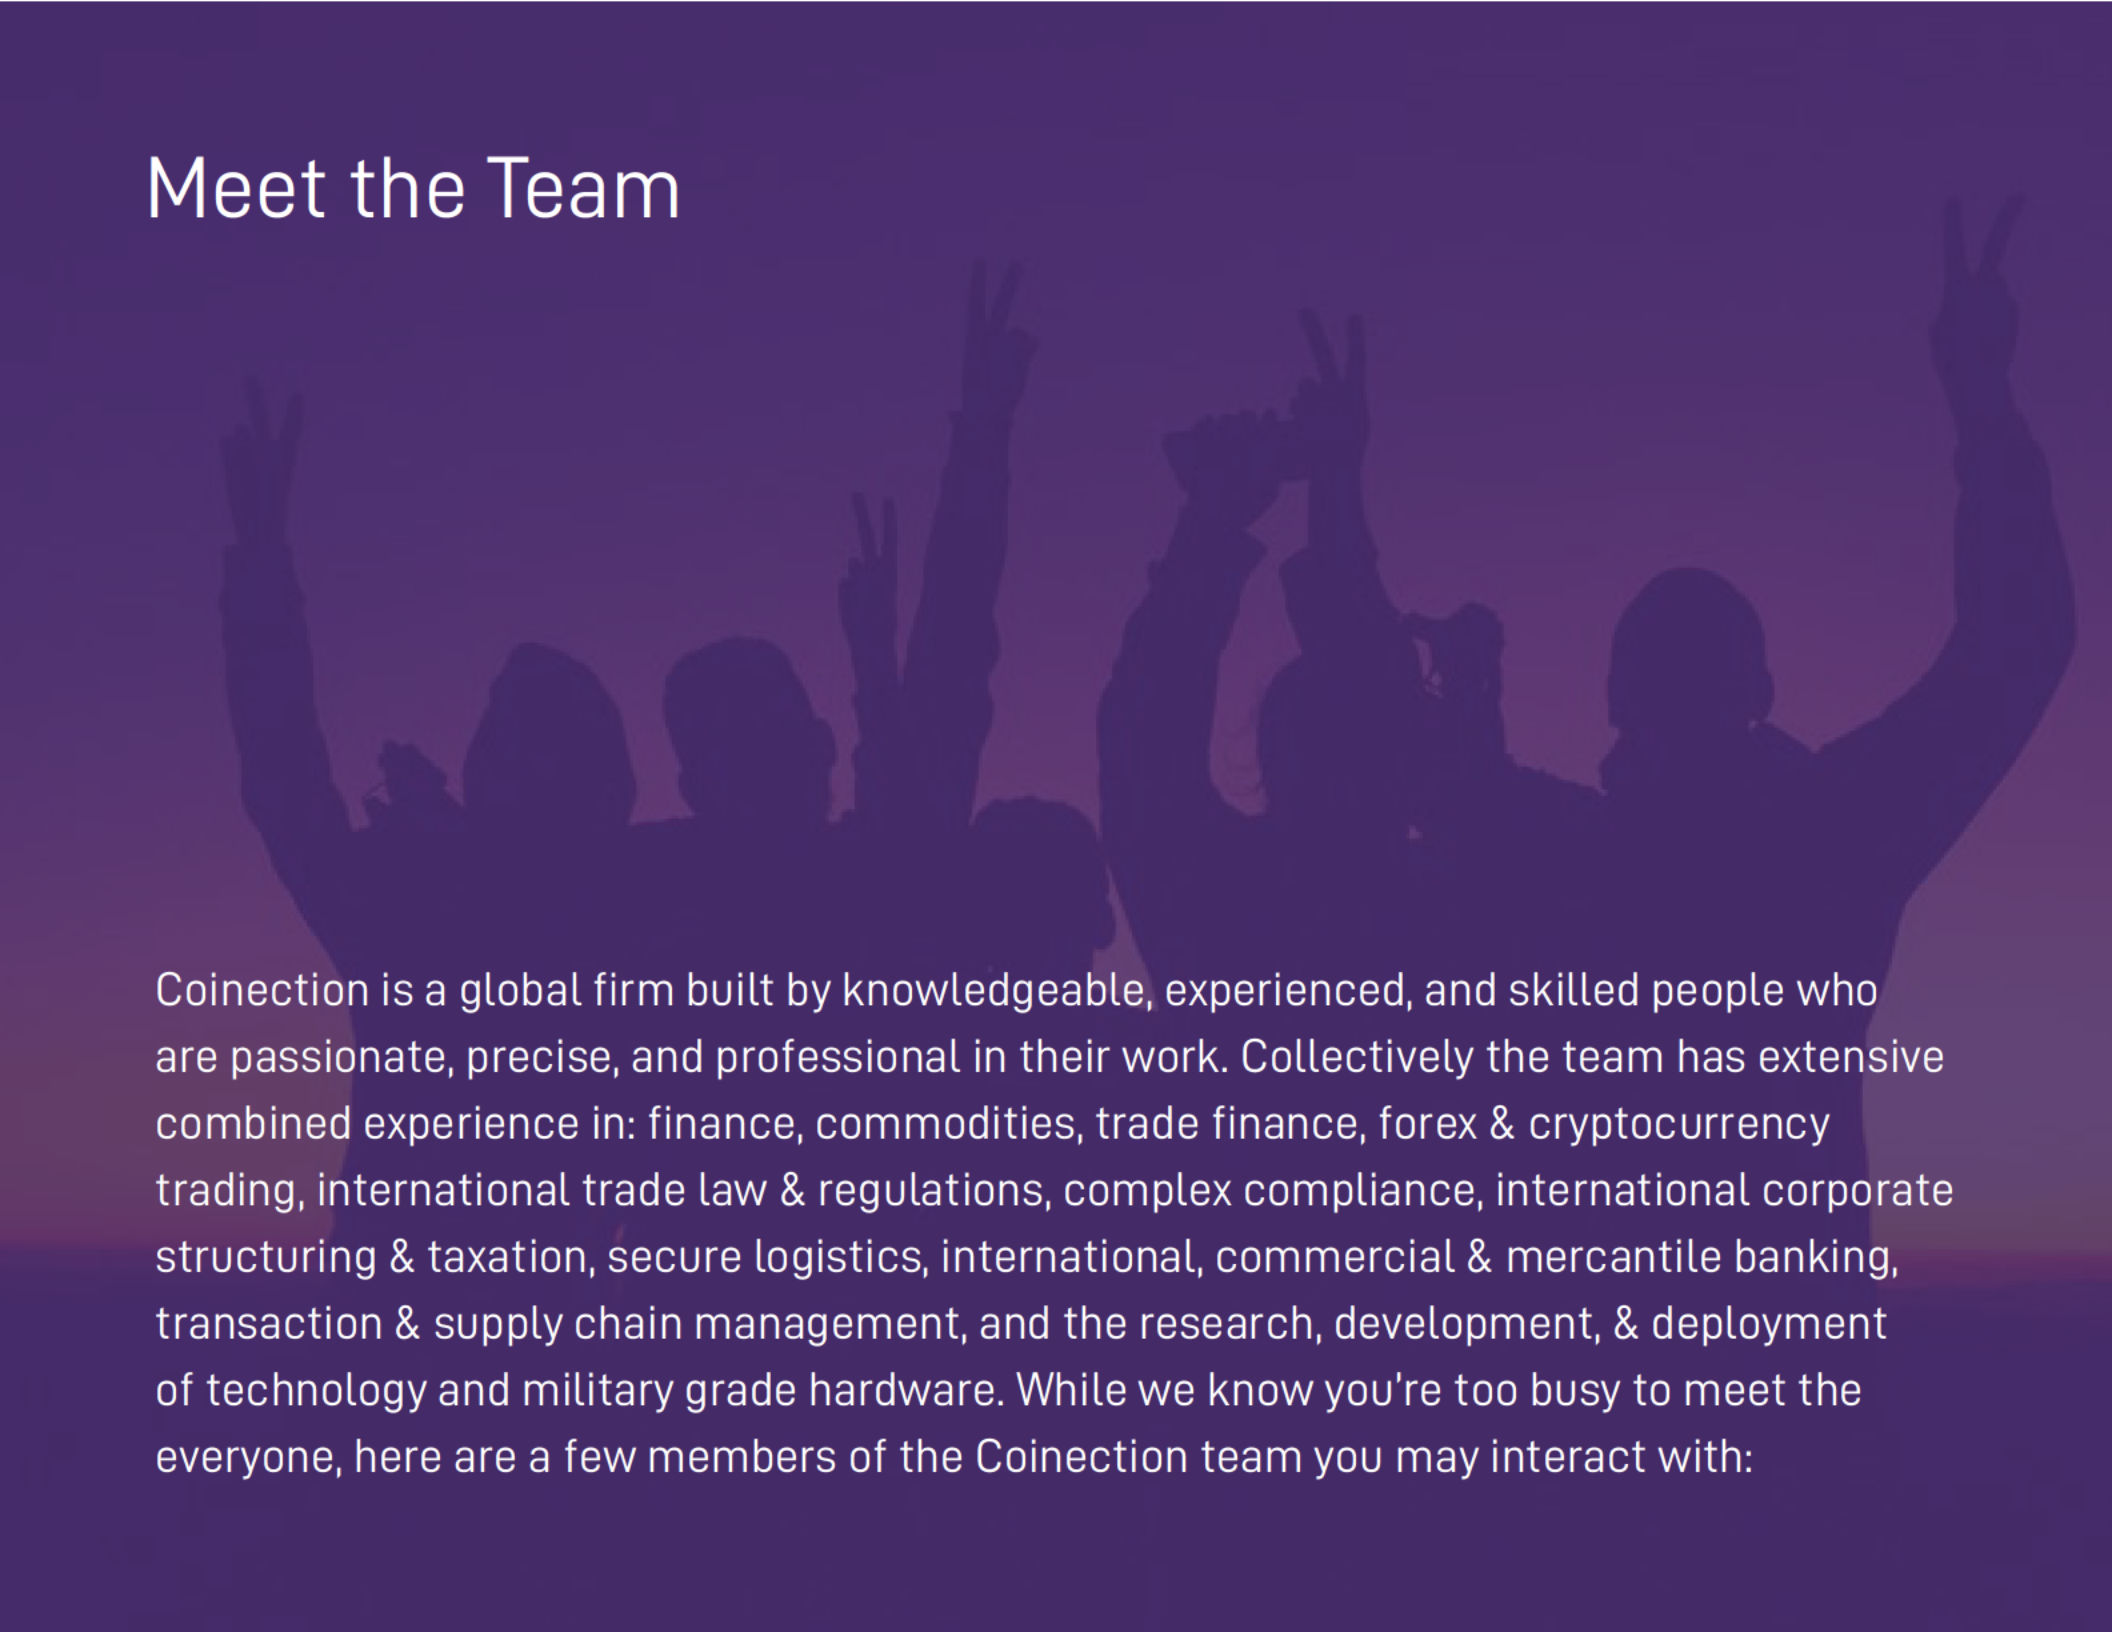

Donations are made to initiatives within our passion areas, including clean water & sanitation, affordable nutrition, affordable housing, education, and economic development. We are especially enthusiastic about opportunities that focus on creating effectual change for children, women, and the forgotten in developing nations.

The funds dedicated to Coinection Cares are divided into two categories, with 60% directed to non-profit organizations and 40% engaged in economic development activities. Non-Profit funding is distributed to well managed non-profit organizations engaged in innovative and effectual change within our passion areas. Economic development activities assist entrepreneurs in the same communities the non-profit funds are deployed to. Properly supported, mentored, and capitalized entrepreneurs are able to develop and sustain economic opportunities and growth for their communities, reducing the need for external support and creating sustainable progress for generations.

Together, we can create sustainable and effectual change!

Meet the Team

Coinnection is a global firm built by knowledgeable, experienced, and skilled people who are passionate, precise, and professional in their work. Collectively the team has extensive combined experience in: finance, commodities, trade finance, forex & cryptocurrency trading, international trade law & regulations, complex compliance, international corporate structuring & taxation, secure logistics, international, commercial & mercantile banking, transaction & supply chain management, and the research, development, & deployment of technology and military grade hardware. While we know you're too busy to meet the everyone, here are a few members of the Coinnection team you may interact with:

Matt Jameson

President & Chief Executive Officer

As a young man, Matt Jameson possessed an entrepreneurial disposition and the instinctive ability to identify gaps in market offerings and create practical solutions for all stakeholders. At fifteen, Mr. Jameson identified a market opportunity, found an investor and co-founded his first venture, which was successfully sold two years later. His career has been built by duplicating his unique process of either founding or purchasing a company, promptly building a synergistic team focused on delivering enhanced value propositions, increasing operational efficiencies and cultivating sustainable growth until such time as an added value gain producing exit occurs.

Mr. Jameson's process has been successfully repeated across a multiplicity of diverse industries including: commodities, trade finance, private equity, pharmaceutical sales & distribution, consumer products & services, healthcare, marketing & digital media, secure logistics, procurement, asset & transaction management, corporate strategy, and financial & operations consulting. In addition to his current role, he has served as a Chairman, Director, Chief Financial, Chief Investment, Chief Operations and Chief Marketing Officer. Mr. Jameson attended Utah Valley University where he studied Accounting & Communication Theory.

In 2010, Mr. Jameson co-founded a commodity & trade finance firm created for the deployment and/or leveraging of internal, institutional, and family office capital assets to securely produce high-yield returns through commodity and trade finance transactions.

Chase Gunderson

Chief Operations Officer

Chase Gunderson has a successful history of managing any stewardship with surgical precision. Prior to joining Coinnection, Mr. Gunderson served as Executive Director of a publicly traded healthcare company. During his tenure in healthcare, he increased his firm's EBITDAR 557% within a three-year period while simultaneously reducing annualized employee turnover by over 75% within two years. His no-nonsense practical approach to operations and human capital management produces results few can attain.

Mr. Gunderson has also served as a Vice President and Private Client Banker at JP Morgan Chase. Additionally, he has also previously served as the President of a document management company specializing in serving large healthcare networks and finance firms. He attended Utah Valley University where he studied Business Management.

Katherine Black

Chief Financial Officer & Chief Legal Officer

Katherine Black is a licensed attorney and actively practices both law and accounting primarily in the areas of corporate law, international trade law, commodities, trade finance, taxation and business & estate planning.

Ms. Black received her Juris Doctorate from the University of California, Davis and obtained an LL.M. in taxation from the University of the Pacific, McGeorge School of Law. She also has bachelor and master degrees in accounting with an emphasis in taxation from Utah State University.

During her professional practice Ms. Black has simultaneously served as the Managing Partner of both law and accounting firms and as a corporate executive. Outside of her professional practice, Katherine also has a passion for education. As such, she has taught accounting and taxation for over twenty-five years at the collegiate level at Brigham Young University; the University of Utah, Graduate Tax Program; University of California, Davis; California State University, Sacramento; and Utah Valley University.

Joseph Gugluizza

Chief Investment Officer

Joseph Gugluizza attended the U.S. Naval Academy where he graduated with a bachelor's degree in computer science. After graduation from the Naval Academy, Mr. Gugluizza was commissioned as an officer in the United States Marine Corps ultimately obtaining the rank of Captain and receiving multiple commendations. After graduating in the top 5% of all graduates at the U.S. Naval Flight School, he flew the Cobra attack helicopter for the remainder of his career. While serving in the military he simultaneously earned his Master of Business Administration in Finance from Boston University.

Since the completion of Mr. Gugluizza's military service, he has worked in the private equity, investment banking, commodities, trade finance and cryptocurrency markets. While serving as a Vice President at RBC Dain Rauscher, he completed over 300 bond issuances. Mr. Gugluizza's career experience expanded as an investment banker for over twenty years for both GE Capital and B.C. Ziegler. Throughout his career Mr. Gugluizza has maintained at least \$200,000,000 in new business per annum, but has completed over \$5,000,000,000 in new business in the last three years.

Gabriel Kazerooni

Chief Security & Intelligence Officer

Gabriel Kazerooni began his career in service to the United States Army where he served in the 3rd Special Forces Group. His efforts included deployments with Tier I elements in Afghanistan and Iraq, specifically performing foreign internal defense, unconventional warfare and direct-action missions. Mr. Kazerooni was assigned as an interrogator in field debriefing with the U.S. Navy Seal Team 6, Task Force 5 and Task Force 20.

At the conclusion of his military service, Mr. Kazerooni worked for the U.S. Defense Intelligence Agency as an Intelligence Officer with TS/SCI/TGH clearance. He has also worked for the U.S. Department of State focused on critical / high threat areas of operation; after which he spent the following twenty plus years in private security and asset protection with Blackwater Security, Academi/IDS. Upon request of the U.S. Department of State, Mr. Kazerooni will occasionally deploy to either train the special forces of U.S. allies or personally direct the security of U.S. Embassy's in critical / high threat areas.

In addition to speaking English, Persian Farsi (Dari), Arabic, Urdu and Hindi, Mr. Kazerooni also earned his Master of Business Administration from Florida Metropolitan University.

Alycia Altom

Chief People Officer

Alycia Altom's passion for people and progress became apparent while studying human development at Utah State University. She quickly became passionate about human potential and performance. Her education and experience have crafted her unique approach focuses on both the psychology and physiological aspects of success in both personal and professional environments. She possesses the rare talent of taking complicated operational algorithms and identifying the personality archetypes individually and collectively requisite for a work group to achieve a synergistic environment and the subsequently successful outcome.

Prior to joining the Coinection team, Ms. Altom served as a Chief of Staff, Chief People Officer, in several leadership roles, including during her time at a financial institution and as the Vice President of Recruiting for an international executive recruiting firm. She ensures the entire Coinection team, wherever deployed, are accompanied by a fully functional corporate apparatus established and equipped to serve our team.

Davin Smith

Chief Innovation Officer

Davin Smith brings a unique perspective to Coinnection as he was born and raised in one of the predominant financial capitals of the world, Bermuda. Mr. Smith's formal education was divided between Bermuda and the U.S.A. He is passionate about continually expanding his knowledge base through ongoing education.

His education cultivated an attention to detail which has served his career in commodities, trade finance, forex & cryptocurrency trading, management of complex, international & multi-party corporate/tax structures, commercial & private banking, wealth management and technology research, development and deployment.

Mr. Smith excels at building long-term & sustainable commercial relationships by establishing reoccurring gain producing transactions combined with established & emerging technology harnessed to produce balanced win/win results for all stakeholders, while operating at the highest levels of integrity and scrutiny.

Tobias Roche

Chief Compliance Officer & Chief Investigator

Tobias Roche started his career in U.S. Federal Law Enforcement in the U.S. Marshal Service where he diligently served through his appointment as the Chief Deputy U.S. Marshal in Washington D.C. After retiring with over twenty-seven years of service, Mr. Roche's career continued through executive and managerial positions with the U.S. Customs Service (USCS), Immigration and Customs Enforcement (ICE). Mr. Roche has also served as a subject matter expert for the U.S. Department of Homeland Security (DHS) and the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF).

He has extensive hands-on experience with criminal & civil investigations, intelligence, security, anti-money laundering, anti-terrorist, anti-drug, asset forfeiture, international trade and immigration matters. Additionally, he is proficient with compliance with the U.S. Patriot Act, BSA, OFAC regulations & sanctions, physical security & operational security, personal security & background investigations, internal control, audit and compliance programs, risk assessment & mitigation.

Mr. Roche earned a bachelors and master degree in criminal justice and subsequently attended Indiana University of Pennsylvania as a

Ph.D. student in Criminology. Mr. Roche is an active member of the Association of Certified Anti-Money Laundering Specialists, the Federal Law Enforcement Officers Association, Florida Association of Licensed Private Investigators, International Association of Financial Crimes Investigators, Association of Former Customs Special Agents, and currently holds TS/SCI clearance with scope in SSBI. He is a license private investigator in the State of Florida.

He has received citations from the U.S. Marshals Service, Immigration & Customs Enforcement, Drug Enforcement Agency, Secret Service, the U.S. Attorney's Office, as well as the governments of Canada, the Bahamas, Trinidad & Tobago, England, France, Nicaragua, and the Philippines. He was recognized by the U.S. Department of State for the first U.S. Visa revocation under the U.S. Patriot Act of a high profile foreign political figure. Mr. Roche is the recipient of the highest integrity award given by the U.S. Department of the Treasury and U.S. Department of Homeland Security for twenty-five years of service.

Mary Black

Corporate Counsel

Mary Black is a licensed attorney and actively practices both law and accounting primarily in the areas of corporate law, trade law, commodities, trade finance, taxation, business, and estate planning. She is passionate and proficient in her areas of focus, bringing a brilliant, solution oriented perspective to the team. Ms. Black has taught Accounting and Taxation classes at Utah Valley University and has a talent for sharing her knowledge about complex matters in an understandable and digestible way.

Ms. Black received her Juris Doctorate from Brigham Young University and her Masters of Taxation from Weber State University.

Bret Votano

Compliance Director

Bret Votano possesses a broad experience in the commodity, trade finance and cryptocurrency markets. After earning his Juris Doctorate from St. John University, School of Law, Mr. Votano practiced law for a large law firm, however, his disposition and skill set led him to senior management. After leaving the practice of law he established real estate investment, private equity, and trade finance firms.

Mr. Votano is experienced as a principal, attorney, and senior executive in private equity, real estate, international trade, trade finance, corporate governance, commercial banking, securities regulations, intellectual property, and compliance. Because of the nature of cryptocurrency, Mr. Votano's unique background makes him the ideal watchman, ensuring Coinnection only participates in fully compliant transactions.

Dr. Kevin Smith, Ph.D., CPA

Transaction Auditor

Dr. Kevin Smith, Ph.D., CPA, obtained his Bachelor of Science in Accounting and Master of Accounting (MAcc) degrees from Brigham Young University, followed by earning a Ph.D. in accounting from the University of Arizona. Dr. Smith has over 16 years of undergraduate and graduate teaching experience at the University of Kansas, the University of Arizona, Brigham Young University, and currently teaches at Utah Valley University and presently serves as a Transaction Auditor of Coinnection.

Dr. Smith's background in teaching has cultivated a skill set of rapidly reviewing near identical information and quickly deducing errors and omissions. In addition to his contributions to the development of the Coinnection Protocol, Dr. Smith also reviews all financial data of each transaction to either confirm no errors occurred or engage corrective actions.

Brett Martin

Regional Vice President

Brett Martin's record of precise planning conjoined with military grade follow through has produced historical results for any organization he either established or served. His disposition has always been to expand what others believe is possible by methodical, well-timed, vertical growth. Mr. Martin has produced such results by developing broadly talented and highly performing teams, built upon a culture of collective empowerment and accountability.

After earning a bachelor's in Psychology from Indiana University, he has obtained twenty years of experience in senior management; typically, as the primary steward of corporate revenue. His thrives on expanding what others believe is possible. Prior to joining the Coinnection team, he served as the Senior Vice President of Sales for Spectranetics where he grew, then managed, the sales team up to 240 people, and increased revenue from Sixty-Three Million Dollars to over Three Hundred Million Dollars. He has also served as President and Chief Executive Officer of a firm specialized in the complex process of bringing cutting-edge and innovative healthcare technology to market.

Pedro Castillo Jimenez

Transaction Director

Pedro Castillo Jimenez was born in The Dominican Republic and quickly flourished in his family's multi-generational sugar cane agriculture operation. From a young age, he was tutored in agriculture and trade methodologies, frequently negotiating contracts for his family's business. He studied both economics and marketing at Concordia University and Lasalle College in Montreal, Canada and in Paris, France at Paris-Sorbonne University.

Mr. Castillo Jimenez expanded his professional career at age 22 when he was appointed Vice-Counsel of The Dominican Republic to Montreal, Canada. During his time at the diplomatic mission he was actively involved in negotiating agreements between The Dominican Republic and Canada regarding international affairs, trade and investment. Since completing his public service in 2004, he has worked within global trade and finance and is frequently retained to liaison for foreign corporations seeking to invest in renewable energy, agriculture, hospitality & tourism, and real estate.

Brian King

Transaction Director

Brian King is an experienced entrepreneur and senior executive with over 30 years of experience within the food and consumer products markets. He has both owned & operated and served as a senior executive of multiple organizations, including food manufacturing, developing consumer brands from concept to launch, re-branding existing concepts, developing and launching start-ups, and consulting with emerging markets.

Mr. King's career has provided leading industry expertise in liquid bottling and packaging, raw material supply, distribution and supply chain, commodity markets, Good Manufacturing Practices (GMP), Hazard Analysis Critical Control Points (HACCP), sales strategies, marketing growth programs, and leading business practices necessary for both retail and food service markets. He has served as a board member for multiple profit and not for profit organizations.

Eddy Song

Transaction Director

Eddy Song has a unique perspective because he was born and raised in Harbin, China, which has resulted in an in-depth knowledge of the Chinese culture and market. After graduating from Shanghai International Study University, he relocated to Canada and pursued a Master's Degree in Education at Brock University in Ontario.

Mr. Song has served in executive roles in the fashion, tech (IoT), branding, digital marketing, commodity, and pharmaceutical industries. Additionally, he manages a vast manufacturing network and assists clients seeking manufacturing services from China. He also helps Chinese brands engage the U.S. marketplace.

In addition to his work in cryptocurrency, Mr. Song is passionate about ensuring the consistent supply of personal protective equipment to developing nations during the current global pandemic. As such, he partnered with major European distributors to ensure the consistent supply of pharmaceuticals and protective equipment to Malaysia, the Philippines, the Middle East, and Latin America.

Mr. Song has been featured in Vogue UK as a fashion designer (wearable tech), secured funding on CBC Dragon's Den (Canadian show similar to Shark Tank), and cultivated partnerships with top brands like MLSE (Toronto Raptors) and Insomniac Events (EDC Las Vegas).

George Kobakov

Transaction Director

Shortly after earning a Bachelor's degree in Political Science and Business Management from York University in 2005, George Kobakov opened his first venture – a digital marketing agency. After building the agency and subsequently selling it for a profit, Mr. Kobakov's passion for starting and building a company capable of thriving in volatile markets was irrevocably ignited. Since said ignition, he has successfully operated in the commodity, cryptocurrency and cannabis markets.

Mr. Kobakov's broad experience ranges from digital marketing, technology development & deployment, commodities, and manufacturing. His streamlined approach begins with a people first approach combined with best practices and common-sense which produces sustainable and scalable revenue models. He is experienced in building balanced, sustainable and ethical sales and marketing strategies and operational algorithms, which historically have produced substantial revenue.

Getting Started

If you own Bitcoin worth at least US\$500,000.00, have reviewed the Coinnection Protocol, and have questions or are ready to sell your Bitcoin to Coinnection via the Coinnection Protocol, please contact Coinnection via email at **info@coinection.com**.

Thank You!
